

NDK_EDF

Last Modified on 06/24/2016 9:57 am CDT

- C/C++
- .Net

```
int __stdcall NDK_EDF(double * pData,
                      size_t nSize,
                      double targetVal,
                      WORD retType,
                      double * retVal
)
```

Calculates the empirical distribution function (or empirical cdf) of the sample data.

Returns

status code of the operation

Return values

NDK_SUCCESS Operation successful

NDK_FAILED Operation unsuccessful. See [Macros](#) for full list.

Parameters

[in] **pData** is the input data series (one/two dimensional array).
[in] **nSize** is the number of elements in pData.
[in] **targetVal** is the target value to compute the underlying cdf for.
[in] **retType** is a switch to select the return output (1=CDF (default), 2=Inverse CDF).
[out] **retVal** is the computed value.

Requirements

Header	SFSdk.H
Library	SFSdk.Lib
DLL	SFSdk.Dll

Examples

```

int NDK_EDF(double[] pData,
            UIntPtr nSize,
            double targetVal,
            short retType,
            ref double retVal
)

```

Namespace: NumXLAPI
Class: SFSDK
Scope: Public
Lifetime: Static

Calculates the empirical distribution function (or empirical cdf) of the sample data.

Returns

status code of the operation

Return values

NDK_SUCCESS Operation successful

NDK_FAILED Operation unsuccessful. See [Macros](#) for full list.

Parameters

- [in] **pData** is the input data series (one/two dimensional array).
- [in] **nSize** is the number of elements in pData.
- [in] **targetVal** is the target value to compute the underlying cdf for.
- [in] **retType** is a switch to select the return output (1=CDF (default), 2=Inverse CDF).
- [out] **retVal** is the computed value.

Exceptions

Exception Type	Condition
None	N/A

Requirements

Namespace	NumXLAPI
Class	SFSDK
Scope	Public
Lifetime	Static
Package	NumXLAPI.DLL
